Shat-R-Shield Brand Expands Lines of Shatter-Resistant Lamps

Salisbury, NC – January 4, 2010 – Shat-R-Shield, the largest manufacturer of shatter-resistant lamps, recently added T5 High-Output and High Intensity Discharge lamps to their Shat-R-Shield brand of safety-coated lighting products. The new T5HO fluorescent and HID lamps offer quality, economy and choice, within the trusted and expanding Shat-R-Shield brand.

The T5HO 54-watt fluorescent (800 Series) lamps offer extreme output of 5000 lumens in a slim-profile lamp that is a sustainable lighting solution. They feature low mercury and are TLCP compliant, both of which reduce impact on the environment. With a rated-life of 30,000 hours, these long-life lamps offer reduced maintenance and recycling costs by extending the relamping cycle. Backed by the best warranty in the industry, the Shat-R-Shield brand T5HO lamps also feature color temperature ratings of 4100°K and 5000°K.

The new Shat-R-Shield brand HID lamps include popular High Pressure Sodium and Metal Halide models. These HID lamps feature high-performance, energy-efficiency and long-life.

Shat-R-Shield lamps are UL-EPH classified, NSF certified, and meet safety regulations in the US, Canada, and Mexico -- including FDA, OSHA, ASME, and CFIA. Please visit www.shatrshield.com or email info1@shatrshield.com
