Shat-R-Shield Brand Expands Line to Include Shatter-Resistant T8 Fluorescent Lamps

Salisbury, NC – August 6, 2010 – Shat-R-Shield, the largest manufacturer of shatter-resistant lamps, recently added high-efficiency T8 fluorescent lamps to their Shat-R-Shield brand of safety-coated lighting products. The new T8 lamps offer quality, economy and choice - all within the trusted and expanding Shat-R-Shield brand.

“We are continually growing the Shat-R-Shield brand of safety-coated lamps to meet the demanding needs of our customers,” said product manager Don Cattoni. “The inclusion of the T8 lamps compliments our current offerings of Shat-R-Shield T5 High-Output and HID lamps.”

As a sustainable lighting solution, the 32-watt fluorescent lamps feature low mercury and are TLCP compliant, both of which reduce impact on the environment. With a rated-life of up to 30,000 hours, these long-life lamps offer reduced maintenance and recycling costs by extending the relamping cycle. Backed by the best warranty in the industry, the Shat-R-Shield brand T8 lamps also feature a CRI of 85, 2800 mean lumens, and color temperature ratings of 4100°K and 5000°K.

Shat-R-Shield lamps are UL-EPH classified, NSF certified, and meet safety regulations in the US, Canada, and Mexico -- including FDA, OSHA, ASME, and CFIA. Please visit www.shatrshield.com or email: info1@shatrshield.com
