

## INCOPLAS™ LED Hybrid

**SHAT-R-SHIELD'S INCOPLAS™ LED HYBRID** fixture is a multi-purpose LED lighting solution that can be used as an area light, flood or wall pack. Composed entirely of thermally conductive engineered polymers and high-impact polycarbonate, this fixture is specifically designed to withstand moisture, dust, salt spray and harsh environments in applications where exposure is detrimental to the life of the luminaire. The INCOPLAS™ LED Hybrid replaces 100W and 250W metal halide lamps as well as T5 and T8 fixtures.

- Countless mounting options-- allows the end user the ability to meet various installation space requirements.
- Corrosion Resistance-- withstands prolonged exposure to highly corrosive elements (moisture, salt spray, acids, bases).
- Durability- NSF and IP69K certifications make fixture ideal for use in high-abuse environments.
- Easy one-person installation.
- Extremely Lightweight-- weighs 7.5 lbs.
- Multitude of lens optic options available.

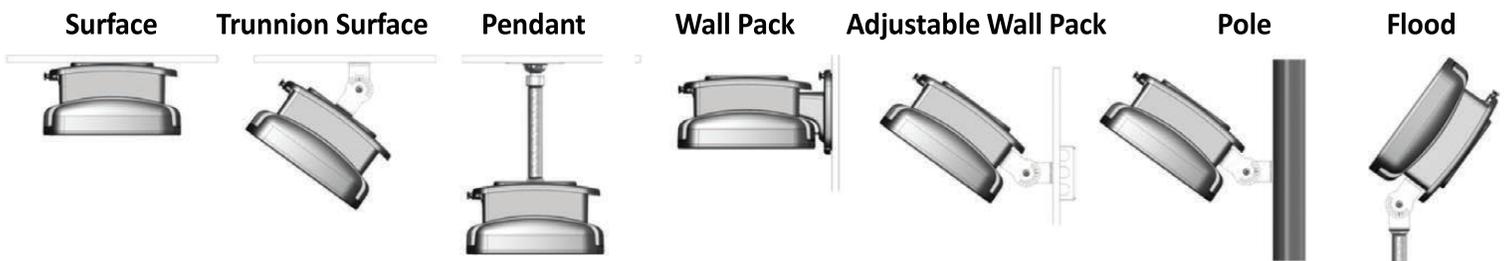

### THERMALLY CONDUCTIVE ENGINEERED POLYMERS

efficiently extract heat away from the light source and offer consistent heat dissipation. The luminaire's natural convection allows for maximum thermal performance while minimizing costs and the material provides chemical and corrosion resistance as well as a substantial reduction in weight over comparable aluminum fixtures. The fixture has no exposed metal other than stainless steel, marine-grade screws and there are no coatings that can chip or corrode.

### PRODUCT SPECIFICATIONS

- 45W / 5,000 Lumens / 5000K / 70+CRI
- 90W / 10,000 Lumens / 5000K / 70+ CRI
- L70 >60,000 Hours
- Universal Driver 120-277V
- 0-10V Dimming
- Operating Temperature: -22°F to 113°F (-30°C to 45°C); Up to 122°F (50°C) in 5,000 lumen package
- Weight: 7.5 lbs. (3.4kg)

### MOUNTING OPTIONS

### CERTIFICATIONS

DLC and Lighting Facts certification verification available per model on website.  
\*NSF Wall Pack version requires flood bracket.

### WARRANTY 5 year limited warranty

### APPLICATIONS

- Marine Facilities
- Industrial Facilities
- Airports
- Food Processing Plants
- Cold Storage/Refrigeration
- Wash Down Areas
- Construction Sites
- Tunnels
- Livestock Farming
- Waste Water Treatment Plants
- Natatoriums

### DIMENSIONS 13"L x 10.25"W x 5.6"H

## COMPONENTS

Thumb screw makes junction box easily accessible and can be loosened or tightened without using any tools; allows for simple one-person installation.

Thermally conductive, engineered polymer material dissipates heat and is resistant to corrosive elements; contains no coating that can crack or flake.

Tapered fins allow for water runoff so the fixture can be washed down with high-pressure and cleaned as often as needed.

Frosted polycarbonate lens shown is 1 of 5 lens options. This particular lens is optically engineered to eliminate hotspots and create uniform, glare-free illumination.

AISI 316 marine-grade, stainless steel screws are corrosion-resistant and can withstand the harshest environments.

Manufactured in America with globally & domestically sourced components.
