

# TEAROFF PROTECTIVE LENS

To ensure long-lasting clear visibility, Shat-R-Shield's 4 layer Protective Film Tearoffs extend life to our lighting fixtures. When dust, paint overspray and scratches reduce light output, simply peel away the outer layer for fresh full lumination. After 4 layers have been removed, a new stack of films can be quickly and easily applied. When the surface eventually deteriorates, just peel away the top layer and keep production moving. One of the primary benefits of our silica-infused multilayer protection film is its exceptional scratch resistance.

**RFX1190 - HYBRID**  
10.125" X 6.875"  
4 PROTECTIVE TEAROFF LAYERS

**RFX1191 - WDHB**  
9.5" DIAMETER  
4 PROTECTIVE TEAROFF LAYERS

**FX1191PL KIT** - Tearoff mounting plate kit needed for initial setup on WDHB.
