

## Water-Resistant LED Lamps

**Shat-R-Shield's IP68\* Water-resistant, safety coated lamps** have a thin layer of silicone coating that completely seals the lamp to protect fragile electronic components against moisture, corrosion and premature failure. These lamps are ideal for any application exposed to harsh environments.

- Crystal clear silicone coating is guaranteed to not yellow, crack or flake for the rated life of the lamp.
- Coating does not affect light output; <1% lumen loss
- Shatter-resistant; safety coating will contain all particles if the lamp is accidentally broken
- Up to 80% more efficient than incandescent lamps
- Compatible with most dimmers
- 25,000+ hours rated lifetime
- 3 year limited warranty

**Watertight Socket Accessories** for fully protected units. Sold only as accessories to our waterproof LED lamps, each socket comes with silicone sleeves that fit over the neck of the lamp and base of the socket to ensure a watertight seal in IP66 conditions. Packaged by 5 and available in pendant, small base and large base options. All sockets are made IP68 capable by applying silicone caulk to the base of the socket at the wires. See installation instructions.

**Applications:** Landscape Lighting, Security Lighting, Walk-In Coolers, Restaurants, Dock Lighting, Industrial, Marine, Parks & Recreation, Food Processing, Wash Down Areas

**Certifications:** RoHS, IP68, NEMA4X

**Part #: WTNB**

- Diameter: 1.62"
- Length: 2.19"

**Part #: WTSB**

- Diameter: 2.5"
- Length: 2.13"

**Part #: WTLB**

- Diameter: 4.75"
- Length: 2.13"

\* IP68 rating for coated lamps is for occasional submersion in water. **DO NOT** use completed assembly for prolonged submersion in water.
